

"Use analysis to make change in a traditional industry"

Mr. Nanxiang Gao
Quality Information Manager
Shanghai General Motor, China
Email: nanxiang_gao@shanghaigm.com

Quality department of SGM has accumulated numerous problem solving records from different business functions, including warranty, on-line inspections and J.D.Power projects in over ten years. By applying text content categorization/analytics technologies, SGM succeed to leverage historical data, categorize quality issues and pre-defined failure modes and parts.

Key words: Quality, content categorization, historical data
