

Open Access, Open Data and Scholarly Publishing

Kathryn D. Sharples
John Wiley and Sons, Oxford, UK
ksharples@wiley.com

Open Access and Open Data are topics of much discussion, and increasing complexity. This talk will provide an overview of current models and trends in Open Access publishing before going on to describe recent international government and institutional policies. The implications of new open access licensing models (eg CC-BY) will be discussed, as will the impact of new licenses on research and publishing output. The impact of an open data and open access environment for learned societies will also be addressed. Wiley's approach to open access and open data publishing will be outlined and future trends will be described.

Key Words: Open access, funder mandates, Data availability, data publishing, data reproducibility, research councils
